

Appln. No. 10/502,109

Attorney Docket No. 10555-46

**I. Amendments to the Claims**

1. (Currently amended) A photodiode comprising:  
a first p-type semiconductor layer;  
an n-type semiconductor layer; and  
a second p-type semiconductor layer disposed between the first p-type semiconductor layer and the n-type semiconductor layer such that the second p-type semiconductor is directly adjacent to the n-type semiconductor, the second p-type semiconductor layer having a graded doping concentration.
2. (Original) The photodiode of claim 1 further comprising an anode layer for collecting holes.
3. (Original) The photodiode of claim 1 further comprising a cathode layer for collecting electrons.
4. (Original) The photodiode of claim 1 wherein the first p-type semiconductor layer is InAlAs.
5. (Original) The photodiode of claim 1 wherein the n-type semiconductor layer is InAlAs.
6. (Original) The photodiode of claim 1 wherein the second p-type semiconductor layer is InGaAs.
7. (Original) The photodiode of claim 1 wherein the graded doping concentration defines a first concentration adjacent to the first p-type semiconductor layer and a second concentration adjacent to the n-type semiconductor layer, and further wherein the first concentration is greater than the second concentration.

Appln. No. 10/502,109

Attorney Docket No. 10556-46

8. (Currently Amended) A photodiode comprising:  
a first p-type semiconductor layer;  
an n-type semiconductor layer; and  
a second p-type semiconductor layer disposed between the first p-  
type semiconductor layer and the n-type semiconductor layer such that the  
second p-type semiconductor is directly adjacent to the n-type semiconductor,  
the second p-type semiconductor layer having a graded doping concentration,  
the graded doping concentration defining a first concentration  
adjacent to the first p-type semiconductor layer and a second concentration  
adjacent to the n-type semiconductor layer, the first concentration being greater  
than the second concentration, and

~~The photodiode of claim 7 wherein the first concentration is being~~  
~~located at a position  $x_0$  and defines defining a concentration  $p_0$ , and further~~  
~~wherein the graded doping concentration is being governed by the following~~  
~~equation:~~

$$p = p_0 e^{\frac{-x}{D}}$$

over the depth D of the second p-type semiconductor layer for all x and D greater than zero.

9. (Currently Amended) The photodiode of claim 8 wherein the depth, D, for the first concentration is between 800 and 1000 angstroms in length.

10. (Currently Amended) A method of fabricating a photodiode comprising ~~the steps of:~~  
 providing a substrate layer;  
 depositing ~~an first p-type~~ n-type semiconductor layer on the substrate;

Appln. No. 10/502,109

Attorney Docket No. 10555-46

depositing an ~~n-type~~ second p-type semiconductor layer having a p-type dopant on the n-type semiconductor layer;

grading ~~[[a]]~~ the p-type dopant of the second p-type semiconductor layer from a first concentration to a second concentration, ~~wherein~~ the first concentration ~~is being~~ greater than the second concentration; and

depositing a first p-type semiconductor layer on the second p-type semiconductor layer, the second p-type semiconductor layer being between the first p-type semiconductor layer and the n-type semiconductor layer such that the second concentration is directly adjacent to the n-type semiconductor layer.

11. (Original) The method of claim 10 further comprising the step of affixing an anode to collect holes.

12. (Original) The method of claim 10 further comprising the step of affixing a cathode to collect electrons.

13. (Original) The method of claim 10 wherein the first p-type semiconductor layer is InAlAs.

14. (Original) The method of claim 10 wherein the n-type semiconductor layer is InAlAs.

15. (Original) The method of claim 10 wherein the second p-type semiconductor layer is InGaAs.

16. (Currently Amended) A method of fabricating a photodiode comprising:

providing a substrate layer;

depositing an n-type semiconductor layer on the substrate;

Appl. No. 10/502,109

Attorney Docket No. 10555-46

depositing a second p-type semiconductor layer having a p-type dopant on the n-type semiconductor layer;

grading the p-type dopant of the second p-type semiconductor layer from a first concentration to a second concentration, wherein the first concentration is greater than the second concentration; and

depositing a first p-type semiconductor layer on the second p-type semiconductor layer, wherein the second p-type semiconductor layer is between the first p-type semiconductor layer and the n-type semiconductor layer such that the second concentration is directly adjacent to the n-type semiconductor layer, and

~~The method of claim 10~~ wherein the first concentration is located at a position  $x_0$  and defines a concentration  $p_0$ , and further wherein the graded doping concentration is governed by the following equation:

$$p = p_0 e^{\frac{-x}{D}}$$

over the depth D of the second p-type semiconductor layer for all x and D greater than zero.

17. (Original) A photodiode having a first p-type semiconductor layer and an n-type semiconductor layer comprising:

a second p-type semiconductor layer disposed between the first p-type semiconductor layer and the n-type semiconductor layer such that the second p-type semiconductor is directly adjacent to the n-type semiconductor, the second p-type semiconductor layer having a graded doping concentration, wherein the graded doping concentration is governed by the following equation:

$$p = p_0 e^{\frac{-x}{D}}$$
